Compilation note: The raw SurveyMonkey exports use one column for each response option. For readability, this PDF converts each set of option columns into one answer field per question. Respondent order and values are unchanged.

Completely blank export fields omitted from the appendix: IP Address, Email Address, First Name, Last Name.

Tranche A: Top-line results

Imagine you see an online advertisement for a product you had not planned to buy. The advertisement clearly states that its words and images were created entirely using artificial intelligence, or AI. The advertisement convinces you to buy the product. After using it, you are satisfied with your purchase.
